Our project is a tool for scrum retrospective sessions. How to use:

1. Go to https://retrospective-tool.herokuapp.com OR http://www.retrospective-tool.com/
2. Creating a room (a) & logging in (b)
   a. Create a new room
      i. Press menu button on top-left corner of the page
      ii. Press button "New room"
      iii. Enter in room name (required) and room password (optional)
   b. Login to a room
      i. Enter room name and password (if the room has one) into the login form (Test room: name: "test-room", no password)
      ii. Enter in a username
      iii. **NOTES:** On wide screens, you'll see the page divided into 2 sections: 1. Retrospective comments & 2. Pointing poker
      On mobile there is a blue swap button to switch between these views
3. Restrospective
   a. Post a new comment
      i. Click on the red button that has a plus sign in it
      ii. Type in your comment
      iii. Choose whether you want to post it as anonymous or not (if not, it will use the username you entered when you logged in)
      iv. Choose the type of the comment (default, start, continue, stop)
      v. Press button "Create"
      vi. **NOTES:** When you create a new comment, it will instantly be added to anyone else that is logged in into the room
   b. Star a comment
      i. Click the star of a comment
      ii. **NOTES:** When you star a comment, it will instantly be starred to anyone else that is logged in into the room
   c. Delete a comment
      i. Click the button "delete" to delete a specific comment
      ii. **NOTES:** A new comment can't be deleted until it's at least 4 hours old. A comment that is starred can't be deleted. When you delete a comment, it will instantly be removed from anyone else that is logged in into the room.
   d. Filter comments
      i. You can use the different options above the retrospective comments to filter the comments
      ii. **NOTES:** Filtering comments will only affect **your** view - it doesn't affect what others can see
4. Pointing poker (To test this, you can open another incognito browser next to the current one)
   a. When you login, you will automatically join the pointing poker game. You will also be automatically synced into the current game state if any.
   b. When you type into the title input, it will update it to all players
   c. You can vote for the current issue using the buttons below the player list

       d.   When the playing card moves to the right of the page, it will indicate that the player has voted

       e.   When you press "Show votes" button it will turn all cards around and calculate the average result

       f.   When you press "Clear votes" button it return all cards to players

5. To logout from a room, you can open the menu from top-left and press the "Exit" button. If you prefer not logging out, you will be automatically in the room when you open the page next time.
